

Distribution

ShipLink

Integrating SAP Business One® FedEx® and UPS WorldShip®.

Selling your product is only half of the challenge. You must now deliver what was promised. Accurate, efficient shipping is the final step in a successful Sales Order process

Your business demands a shipping tool that connects your sales instructions directly to your shipping department; seamlessly, effortlessly and economically.

ShipLink connects Business One FedEx® and UPS WorldShip®. Embedded into Business One, ShipLink lets you create multi-box shipments, track the items in each box, interface shipment information to FedEx® and UPS WorldShip® then return tracking numbers and shipping costs to SAP® Business One.

All with the click of a button.

- ShipLink enables users to organize shipments into packages.
- Delivery notes can be prepared for individual boxed items within a complete shipment.
- Saves time by allowing users to perform batch processing of shipments.
- Invoices can be automatically generated by ShipLink directly through Business One
- Real-time tracking information through UPS WorldShip® and FedEx® is at your fingertips through individual delivery notes.

For more than 14 years Third Wave Business Systems has been helping clients profit from the implementation of value-driven business management systems that streamline their business processes, provide valuable insight into critical business data, and help them achieve operational efficiency.
